

WestWon Woodland and Sustainability

We have launched our new initiative – 'Branch out and plant a tree in the WestWon Woodland'

How does it work?

When you complete a lease agreement with us, starting from 2022, we will plant a tree for every month of the lease term in the WestWon Woodland.

The company

We have teamed up with Ecologi, a UK based social enterprise. They are a company that helps plant trees in the UK and abroad.

Other key plans in place

VAT Loans is a paperless office. We have managed to eliminate all unnecessary paper documents through using our own personalised CRM system. We also suggest in one of our blogs the use of LED light bulbs (which is something that we have installed in our offices).

Our goals

- We aim to plant 100,000 trees in the next 5 years
- We aim to remove 7,500 tonnes of CO2 from the atmosphere within 5 years

How to view our Woodland

You can view our Woodland by visiting our WestWon Woodland page or going to Ecologi's website directly.

Compliance

We have both our chairman's statement and our climate positive charter on our website. We must be careful when using the correct wording, and in this case, we are a climate positive workforce, working towards becoming a climate negative company in the future.
